WE OFFER

INTERVENTION

AVERTING CRISIS

Research has demonstrated that programs that adhere to the principles of risk, need, and responsivity and use a cognitive behavioral approach are the most effective at reducing recidivism.

EDUCATION

FUTURE BLUEPRINTING

Even very basic education, like adult literacy and basic skills, can significantly reduce the rate of recidivism. Allowing inmates to finish their high school diplomas, learn a trade and technical skills, and pursue post-secondary educational opportunities while incarcerated can greatly reduce recidivism as well.

VOCATION

ESTABLISHING STABILITY

Helping Felons and their families by giving them the necessary tools to reduce their risk of recidivism and to help the offender reintegrate into society by being a law-abiding citizen
